# Wiring Harness Solutions: Design, Reverse Engineering & Manufacture

TRENT INSTRUMENTS specializes in the design, reverse engineering, and manufacture of custom electrical harnesses for demanding applications. Our expertise ensures high-performance solutions for power and control systems.

### Our Services Include:

- Reverse Engineering: Reproducing obsolete or hard-to-source harnesses.
- Custom Harness Design: Tailored solutions for specific electrical systems.
- Manufacturing & Assembly: High-quality production using advanced crimping, plug assembly, and precision wiring techniques.
- Prototype & Testing: Rigorous validation for durability and compliance.
- Component Sourcing: Expertise in Harting, Staubli, Deutsch, and Nira connectors.

### Applications & Industries:

- Rail & Transportation
- Industrial Equipment
- Power Generation
- Automotive & Aerospace
